MEDICAL ANTHROPOLOGY

Fall 2016

Tues/Thurs 11:00am-12:20pm

Room: ELH 100

COURSE DESCRIPTION & OBJECTIVES

This course is an introduction to the anthropological study of illness, healing, and medicine.

We will explore the cultural and historical specificity of what appear to be biological givens, drawing from a variety of anthropological questions, theoretical approaches, and research techniques.

We begin by examining the experience of illness and the ways in which understandings of disease and health are affected by--and in turn influence--social, cultural, and political concerns. We will approach biomedicine as one of many culturally produced medical systems, comparing ways of seeing and knowing across traditions and exploring the power of medicine to

act as a form of social control. Finally, we will examine the ways in which local and global inequalities produce contemporary suffering and the role that anthropology might play in addressing these issues.

Student Learning Outcomes

By the end of the class, students should be able to:

- ◆ Apply an anthropological perspective to the analysis of current issues related to disease, health, and medicine.
- ◆ Demonstrate knowledge of an issue facing one or more countries other than the United States, by describing its cultural, economic, geographic, historical, political, scientific and/or sociological dimensions.

COURSE REQUIREMENTS

Lecture Attendance & Activities (5% of grade)

The weekly class sessions are a main source of learning for the course. Please arrive to class on time and plan to stay for the entire session.

There will be various activities throughout the quarter that are designed to give you an opportunity to apply the concepts we have been learning in class. These may include quizzes, short reflections, film viewing guides, or other activities. No make-up or late assignments will be accepted, but missing one activity will not have an effect on your grade.

All lecture slides will be posted on the course website, though many of them contain images rather than text. Please come to class prepared to take notes.

Discussion Participation (20% of grade)

Discussion sections are an important component of the course and offer opportunities for further learning.

You are required to participate in AT LEAST EIGHT (8) discussions throughout the quarter. Only one discussion each week will count toward your grade, and no make-ups are possible.

Discussions will meet online during week 1 and in person beginning week 2.

Exams (40% of grade)

There will be one in-class midterm and a final exam. Exams may include multiple choice, identification, short answer, and essay questions related to assigned readings, lectures, and discussions. A study guide will be distributed one week before each exam.

Make-up exams will only be available in extraordinary and well-documented situations.

Illness Narrative (35% of grade)

For this project, you will visit and interview someone who has recently experienced an illness or other medical event (broadly defined). Interviews should be conducted in person.

After conducting your interview and writing your field notes, write an "illness narrative" that describes the experience and interprets it in relation to one or more of the topics covered in this class.

Complete the project in three stages:

1. Interview field notes: Complete your interview and take detailed field notes.
2. Brainstorm: Analyze your interview notes & identify central elements of the narrative.
3. Analysis: Write a 1,200 word (-4-5 double-spaced pages) paper analyzing and presenting the narrative.

Additional information, an interview guide, and a grading rubrics will be posted to the course website.

For further assistance with the writing process, the [UCI Writing Center](#) offers drop-in and on-line peer consultations.

COURSE POLICIES

If you have any questions not answered in this syllabus, please contact the professor or your TA. It is best to visit office hours to speak in person.

Outside of office hours, email (ajenks@uci.edu) is generally the best way to contact the professor.

During the week (Mon-Fri), I aim to respond to messages within 24 hours. Please remember to include the name of the course in the subject line and your full name in your message.

Electronic devices are useful tools but often distract from learning. Make sure your cell phones are silenced and put away during class. Do not text or make/accept phone calls during class.

You may use a laptop/tablet in class, but only to take notes or access class materials like lecture slides. Do not use your laptop to explore the internet, Tweet, visit Facebook, etc. Because many individuals are distracted by glowing screens in their line of vision, **the first 5 rows of our classroom will be a "screen free zone"**. If you wish to take notes on a laptop or tablet, please sit in rows

6 or higher. The professor may ask that all devices be put away during some portions of selected class sessions, so please come to class prepared with pen & paper.

Audio or video recording is not allowed without explicit written permission from the instructor.

Technology & Communication

Accommodations

The UCI Disability Services Center ensures access to educational programs and resources for all students. The Center assists students whose disabilities include orthopedic, visual, hearing, learning, chronic health, and psychological disabilities.

If you need an accommodation because of the impact of a disability, please contact the Center at 949-824-7494 or <http://disabilityuci.edu/> and, if applicable, bring your faculty notification letter to the professor.

Additional Resources

LARC: The [Learning and Academic Resource Center](#) offers several forms of academic assistance, including workshops on academic reading, exam preparation, note-taking in lectures, and study techniques.

The UCI Library is an excellent resource. The Anthropology Reference Librarian, Ms. Pauline Manaka, has developed a helpful [online guide to Anthropology scholarship](#).

Academic Integrity

Learning in this class depends on you completing all required assignments yourself. Violations of academic integrity (cheating, plagiarism, etc.) will result in no credit for the assignment and possible course failure and referral for disciplinary action. If you are unfamiliar with UCI's policies on academic integrity, please go to <http://www.editor.uci.edu/catalogue/appx/appx.2.htm>

Missed or Late Work

You are responsible for all material covered in the course. Lecture activities can not be made up, but missing one lecture activity will not affect your grade.

Make-up exams will only be given in extraordinary and well-documented situations. All other assignments will lose 5 points for each day of lateness (including weekends, holidays, etc.).

Grade Appeals

Your final grade is based on the total points you earned during the quarter. No individual extra credit is given. Requests for a regrade should be submitted in writing within 48 hours of receiving the grade. You must submit your original graded assignment and a detailed written explanation of how your work meets the requirements of the assignment/rubric.
